

- Available as a Dual 3-Channel or Single 6-Channel Multiplexer
- 30 A Rating at 40 V
- 40 A With Single Relay Closure
- Very High Hot Switch Capacity
- Very High Inrush Current Rating
- Fast Operating Speed
- Long Service Life
- VISA, IVI & Kernel Drivers Supplied for Windows
- Supported by PXI or LXI Chassis
- Supported by **eBIRST™**
- 3 Year Warranty

The 40-667A is a high current multiplexer available in dual 3-channel or single 6-channel configurations occupying two PXI slots. The switches used are fully isolated solid state relays which offer fast operation under hot switching conditions and high inrush current with no operational life degradation.

Each multiplexer channel can carry 30 A continuous current and can switch up to 40 V. The multiplexer can support 40 A continuous operation for a single relay closure. Channels can also sustain inrush current in excess of 120 A and, because the switches are polarity insensitive, can handle AC or DC signals.

The 40-667A can be operated as a conventional multiplexer with break-before-make action when a new channel is selected. Alternatively, product variants can be supplied that allow multiple channels to be simultaneously selected.

The 40-667A channel selection configurations have been revised from the 40-667. The 40-667A module defaults to single channel selection with multiple channel selection variants defined by use of a suffix.

The 40-667A is particularly suited to automotive and aerospace applications where the switching of high capacity loads is required. The module is supplied with a comprehensive package of drivers, including support for selected RT operating systems.

Supported by eBIRST

eBIRST switching system test tools simplify fault-finding by quickly testing the system and graphically identifying the faulty relay.

40-667A-011 Dual 3-Channel Solid State Multiplexer Schematic Diagram

40-667A-012 Single 6-Channel Solid State Multiplexer Schematic Diagram

Relay Type

The 40-667A is fitted with solid state MOSFET switches.

Switching Specification

Switch Type:	Solid State MOSFET
Max Switch Voltage:	$\pm 40\text{ V}^*$ (DC or AC peak) [†]
Continuous Switch Current:	30 A continuous, 40 A continuous with single relay per module closed
Peak Current:	120 A for 200 μs
Max Common Current:	40 A
Path Resistance - On:	6 m Ω at 25 °C typical
Leakage Current (at $\pm 40\text{ V}$):	<1 μA at 25 °C and switch cold, <250 μA at max temperature immediately after switch has carried maximum current for >10 minutes.
Rise/Fall Time:	40 μs /140 μs (typical)
Operate Time:	250 μs
Max Operating Speed at nominal load:	60 operations/sec
Expected Life (operations):	Indefinite when used within ratings

* For full voltage rating, signal sources to be switched must be fully isolated from mains supply and safety earth.

[†] Differential voltage between channels must not exceed rated voltage, additional caution should be used when applying AC voltages as multiple asynchronous supplies can create high differential voltages between channels.

Power Requirements

+3.3 V	+5 V	+12 V	-12 V
100 mA	350 mA	0	0

Mechanical Characteristics

Dual slot 3U PXI (CompactPCI card).

3D models for all versions in a variety of popular file formats are available on request.

Connectors

PXI bus via 32-bit P1/J1 backplane connector.

Front panel signal connectors:

- 40-667A-011 - 2 x 8-pin male power D-type
- 40-667A-012 - 8-pin male power D-type

For pin outs please refer to the operating manual.

Operating/Storage Conditions

Operating Conditions

Operating Temperature:	0 °C to +55 °C
Humidity:	Up to 90 % non-condensing
Altitude:	5000 m

Storage and Transport Conditions

Storage Temperature:	-20 °C to +75 °C
Humidity:	Up to 90 % non-condensing
Altitude:	15000 m

PXI & CompactPCI Compliance

The module is compliant with the PXI Specification 2.2.

Local Bus, Trigger Bus & Star Trigger are not implemented.

Uses a 33 MHz 32-bit backplane interface.

Safety & CE Compliance

All modules are fully CE compliant and meet applicable

EU directives: Low-voltage safety EN61010-1:2010,

EMC Immunity EN61326-1:2013,

Emissions EN55011:2009+A1:2010.

Product Order Codes - Solid State Multiplexer

Channel Selection	Model Variant	Order Code
Single	Dual 3-Channel 30 A MUX	40-667A-011
Single	Single 6-Channel 30 A MUX	40-667A-012

Note: The above modules are available in multiple channel selection mode by adding the "-M" suffix to the part number.

For example, the dual 3-channel MUX with multiple channel capability would be: **40-667A-011-M**

Product Customization

Pickering modules are designed and manufactured on our own flexible manufacturing lines, giving complete product control and enabling simple customization to meet very specific requirements.

Customization can include:

- Alternative relay types
- Mixture of relay types
- Alternative number of relays
- Different performance specifications

All customized products are given a unique part number, fully documented and may be ordered at any time in the future. Please contact your local sales office to discuss.

Support Products

eBIRST Switching System Test Tool

This product is supported by the *eBIRST* test tools which simplify the identification of failed relays, the required *eBIRST* tools are below. The 40-667A-011 requires a single tool, the 40-667A-012 requires master slave testing and two sets of tools are required together with the master slave cable **93-970-301**.

For more information go to: pickeringtest.com/ebirst

Product	Test Tool	Adaptor	Termination
40-667A	93-005-001	93-005-236	93-012-103

Mating Connectors & Cabling

For connection accessories for the 40-667A module please refer to the [90-012D](#) 8-pin power D-type Connector Accessories data sheet where a complete list and documentation can be found for accessories, or refer to the Connection Solutions catalog.

Chassis Compatibility

This PXI module must be used in a suitable chassis. It is compatible with the following chassis types:

- All chassis conforming to the 3U PXI and 3U Compact PCI (cPCI) specification
- Legacy and Hybrid Peripheral slots in a 3U PXI Express (PXIe) chassis
- Pickering Interfaces LXI or LXI/USB Modular Chassis

Chassis Selection Guide

Standard PXI or hybrid PXIe Chassis from any Vendor:

- Mix our 1000+ PXI switching & simulation modules with any vendor's PXI instrumentation
- Embedded or remote Windows PC control
- Real-time Operating System Support
- High data bandwidths, especially with PXI Express
- Integrated module timing and synchronization

Pickering LXI or LXI/USB Modular Chassis—only accept our 1000+ PXI Switching & Simulation Modules:

- Ethernet or USB control enables remote operation
- Low-cost control from practically any controller
- LXI provides manual control via Web browsers
- Driverless software support
- Power sequencing immunity
- Ethernet provides chassis/controller voltage isolation
- Independence from Windows operating system

Connectivity Solutions

We provide a full range of supporting cable and connector solutions for all our switching products—20 connector families with 1200+ products. We offer everything from simple mating connectors to complex cables assemblies and terminal blocks. All assemblies are manufactured by Pickering and are guaranteed to mechanically and electrically mate to our modules.

Connectors & Backshells

Multiwire Cable Assemblies

RF Cable Assemblies

Connector Blocks

We also offer customized cabling and have a free online **Cable Design Tool** that can be used to create custom cable solutions for many applications. Visit: pickeringtest.com/cdt to start your design.

Mass Interconnect

We recommend the use of a mass interconnect solution when an Interchangeable Test Adapter (ITA) is required for a PXI or LXI based test system. Our modules are fully supported by both Virginia Panel and MacPanel.

Pickering Reed Relays

We are the only switch provider with in-house reed relay manufacturing capability via our Relay Division. These instrument grade reed relays feature **SoftCenter™** technology, ensuring long service life and repeatable contact performance. To learn more, please go to: pickeringrelay.com

Programming

Pickering provide kernel, IVI and VISA (NI & Keysight) drivers which are compatible with all Microsoft supported versions of Windows and popular older versions. For a list of all supporting operating systems, please see: pickeringtest.com/os

The VISA driver is also compatible with Real-Time Operating Systems such as LabVIEW RT. For other RTOS support contact Pickering. These drivers may be used with a variety of programming environments and applications including:

- **Pickering Interfaces Switch Path Manager**
- **National Instruments** products (LabVIEW, LabWindows/CVI, Switch Executive, MAX, TestStand, VeriStand, etc.)
- **Microsoft Visual Studio** products (Visual Basic, Visual C++)
- **Keysight** VEE and OpenTAP
- **Mathworks** Matlab
- **Marvin** ATEasy
- **MTQ Testsolutions** Tecap Test & Measurement Suite

Drivers for popular Linux distributions are available, other environments are also supported, please contact Pickering with specific enquiries. We provide Soft Front Panels (SFPs) for our products for familiarity and manual control, as well as comprehensive documentation and example programs to help you develop test routines with ease.

To learn more about software drivers and development environments, please go to: pickeringtest.com/software

Signal Routing Software

Our signal routing software, Switch Path Manager, automatically selects and energizes switch paths through Pickering switching systems. Signal routing is performed by simply defining test system endpoints to be connected together, greatly accelerating Test System software development. To learn more, please go to: pickeringtest.com/spm

Diagnostic Relay Test Tools

eBIRST Switching System Test Tools are designed specifically for our PXI, PCI or LXI products, these tools simplify switching system fault-finding by quickly testing the system and graphically identifying the faulty relay.

To learn more, please go to: pickeringtest.com/ebirst

Three Year Warranty & Guaranteed Long-Term Support

All standard products manufactured by Pickering Interfaces are warranted against defective materials and workmanship for a period of three years from the date of delivery to the original purchaser. Extended warranty and service agreements are available for all our modules and systems with various levels to suit your requirements. Although we offer a 3-year warranty as standard, we also include guaranteed long-term support—with a history of supporting our products for typically 15-20 years. To learn more, please go to: pickeringtest.com/support

Available Product Resources

We have a large library of product resources including success stories, product and support videos, articles and white papers as well as application specific product brochures to assist when looking for the switching, simulation and connection solutions you need. We have also published handy reference books on Switching Technology and for the PXI and LXI standards.

To view, download or request any of our product resources, please visit: pickeringtest.com/resources
