Letter of Volatility

Model Number:	60-191-002	**Vendor:**	Pickering Interfaces

This LoV is applicable for modules listed in the Supported Modules Section

Volatile Memory
Memory whose contents are lost when power is removed.

Type:	Size:	User Modifiable:	Function:	Process to Sanitize:
NXP LS1012A	256 Byte		Contains volatile storage registers	Power down
DDR3-SDRAM	512 MB	No	Contains Filesystem Data	Power down
Lattice ECP3 LFE3-17EA-6FTN256C	700Kbit (EBR RAM) 36Kbit (distributed RAM)	No	Contains FPGA Code	Power down
LCMXO3L-2100C-5BG256C	16kb Internal distributed RAM 74kb EBR SRAM	Yes	Trigger generator/translator	Power down
MB85RC64 FRAM	64 kbit	No	Contains module configuration	No user data held

VAT Reg: GB418403372 – Company Number: 1029133 (Registered in England)
Pickering Worldwide Offices: UK – USA – Germany – France – Sweden – China – Czech Republic

Non - Volatile Memory
Memory whose contents are retained when power is removed.

Type:	Size:	User Modifiable:	Function:	Process to Sanitize:
W25Q64JVSSIQ SPI FLASH	64MB	No	Contains FPGA code and hardware ID	No user data held
FM24V05-G	512kbit	No	Calibration memory	No user data held
FM24V05-G	512kbit	No	Relay counting memory	No user data held
W25M161AWEIT NAND Flash	128Mbit	No	Contains device configuration data including MAC Address, serial number, model ID, Firmware revision, address string.	None required
SD RAM	4GB or larger	Yes	Contains device configuration data including network host name, static IP address, IP assignment setting, DHCP timeout and discovery methods.	Manually depressing the LCI reset button will force all configuration settings to factory default. Sanitize by removing MMC card from controller.

Supported Modules
60-191-002-204, 60-191-002-162, 60-191-002-120, 60-191-002-080
